DRIFT & DISCOVER · FOR YOU

Draw your own sea

Every creature and treasure in your sea can be one of your own drawings. This guide shows how to draw and frame each one so it fits right in.

I can't wait to see them. R.

HOW IT WORKS

Each drawing replaces one part of your sea

- Draw any of the things on the right. Each one swaps in for the one already in your sea.
- **Draw as many or as few as you like.** Anything you haven't drawn keeps its current look, so you can add them one at a time.
- Your drawings show up in the shop too, and your pearl becomes the little pearl icon next to your pearl count.
- Send each finished drawing to me with the name on the right, and I'll put it into your sea.
- Changed your mind about one? Just tell me, and it goes back to how it was.

```
whale.png
jellyfish.png
seahorse.png
bottle.png
pearl.png
kelp.png
coral.png
chest.png
ruins.png
background.png
```

Every one is optional. Using these names helps me put each drawing in the right place.

RULES FOR EVERY PICTURE

Five things that make a drawing fit

- **PNG with a transparent background.** Save it without the paper or background layer. Only the background painting can be a JPG.
- **Crop tight.** The edges of the file are the edges of the thing. Empty margins make it look smaller and off-centre.
- **Draw in daylight colours.** Your sea adds the lighting itself: darker at night, and hazier for things far away. No need to darken anything yourself.
- **Face the right way.** The whale, seahorse and bottle face **right**. They turn around by themselves when they swim the other way.
- **Size is forgiving.** The sizes in this guide are plenty. Bigger is fine too, it just won't look any sharper.

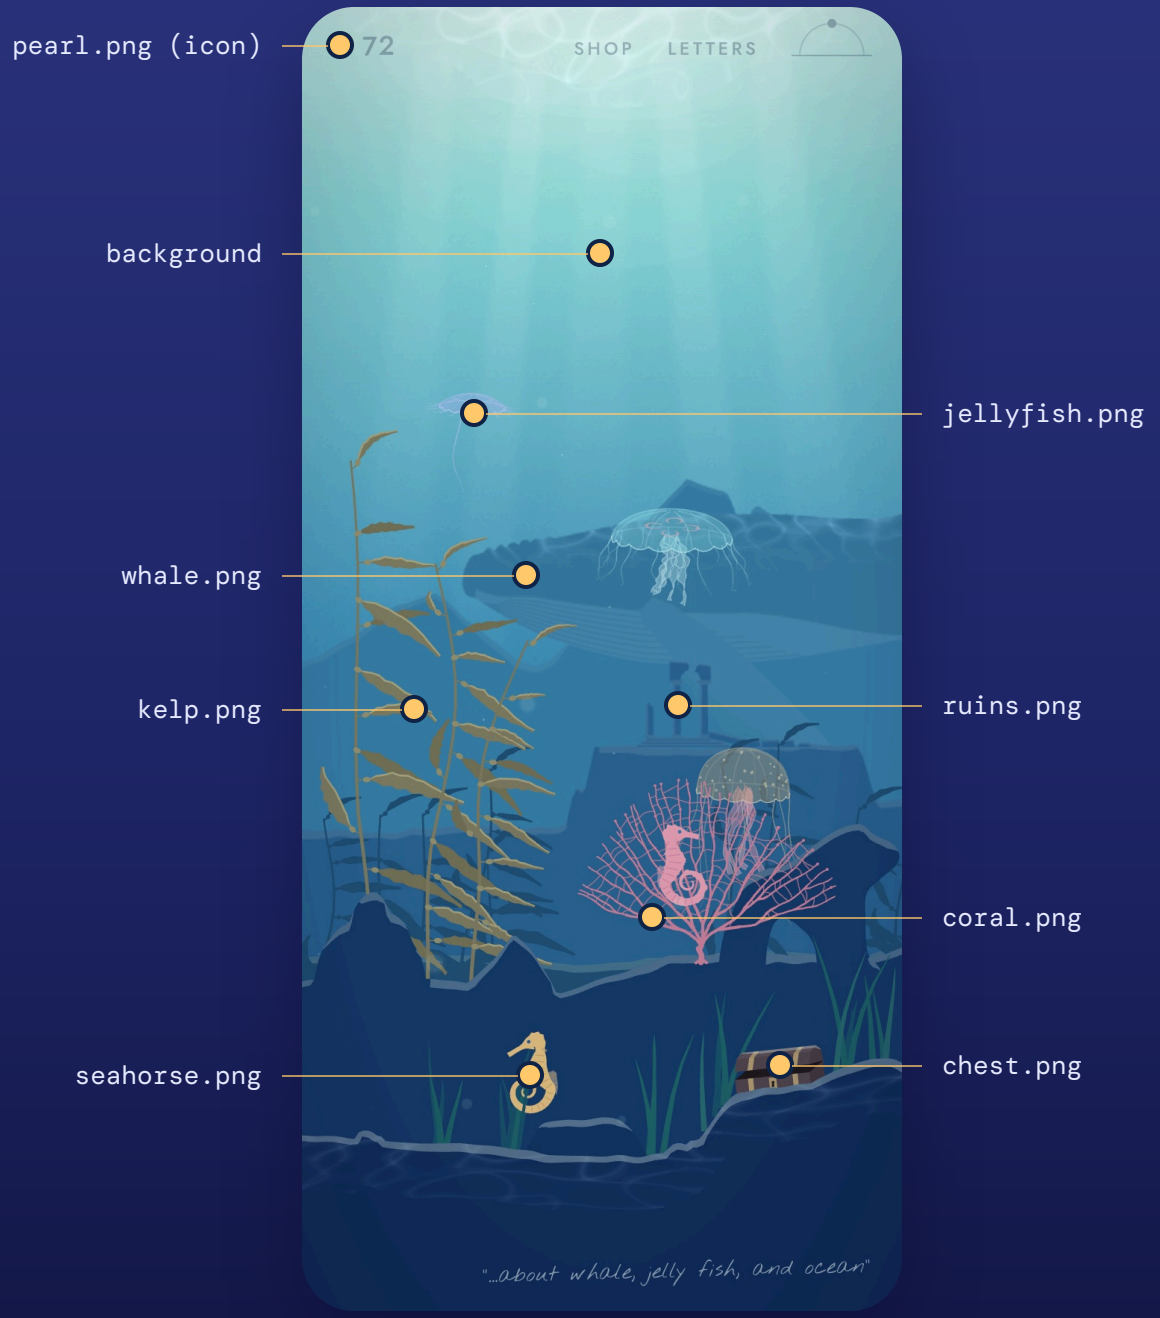

Good to know

- Soft or textured edges are fine. Partly see-through areas stay see-through.
- The jellyfish gently squashes as it swims, the kelp and coral sway, and the chest hops when tapped. Keep shapes that still read when slightly stretched.
- Several kelp plants are drawn from one picture, with every other one mirrored.
- The glow and the night sparkles are added around your drawing, so you don't need to draw them.

WHERE EACH DRAWING GOES

The parts of your sea you can draw

The bottle only appears when it drifts in, and the Guardian pearl only after you tap the whale, so neither shows here. The background replaces the water and everything far away. The rocks, seagrass and sand in front stay as they are.

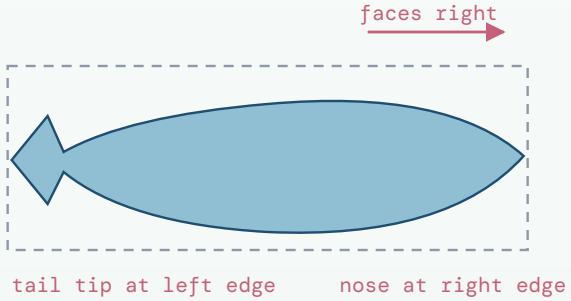

CREATURES

Whale, jellyfish, seahorse

whale.png

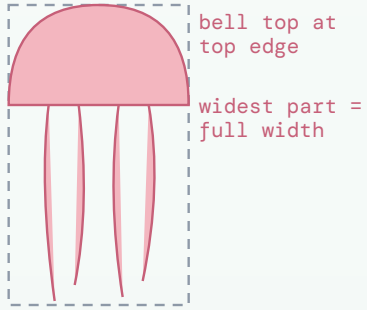

about 1400 × 500

- Side view, facing **right**.
- Nose touches the right edge, tail tip the left edge.
- Crosses far behind the reef, so it is shown hazy and soft.

jellyfish.png

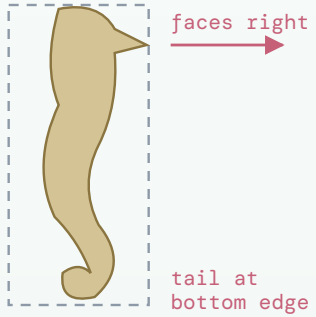

about 500 × 700

- Bell at the top, tentacles hanging down.
- The widest part of the bell spans the full width.
- Colour versions, optional: `jellyfish-cyan`, `-lilac`, `-gold`, `-ribbon`.

seahorse.png

about 400 × 700

- Upright, facing **right**. It flips itself to face left.
- Top of the head at the top edge, tail at the bottom edge.
- Colour versions, optional: `seahorse-coral`, `-gold`, `-lilac`.

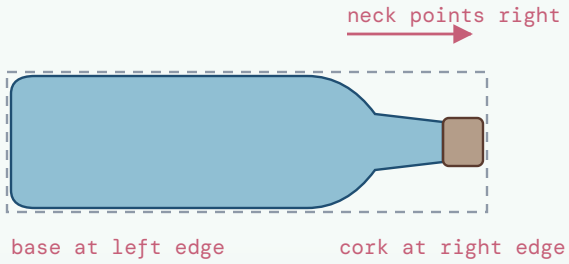

You can draw one jellyfish and one seahorse for all of them, or a separate drawing for each colour. Any colour you haven't drawn uses the plain one.

THINGS

Bottle and pearl

bottle.png

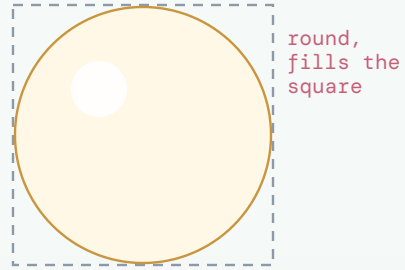

about 600 × 220

- Lying on its side, neck pointing **right**.
- Used for each day's bottle and the ones resting on the ledge.
- The cork popping and the note unrolling still happen as before.

pearl.png

about 160 × 160

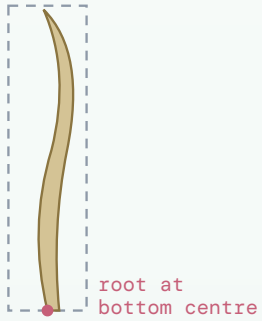

- Round, filling the square.
- The Guardian pearl the whale leaves on the seabed.
- Also the little pearl icon by your pearl count and in the shop, so it should look good very small.

SEABED DECORATIONS

Kelp, coral, chest, ruins

kelp.png

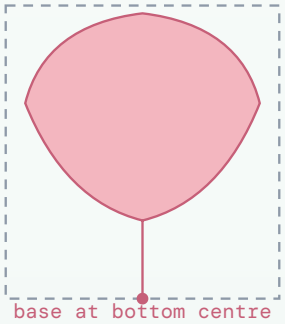

about 300 × 1000

- One tall plant, root at the bottom centre.
- Sways. Three stand in the sea, every other one mirrored.

coral.png

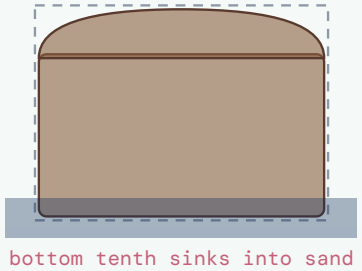

about 800 × 800

- The sea fan, base at the bottom centre.
- Sways a little from its base.

chest.png

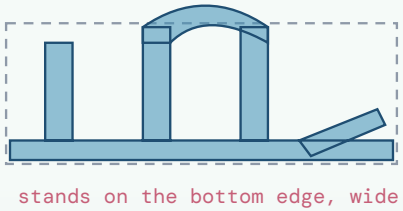

about 700 × 500

- Front view.
- The bottom tenth is hidden in the sand.
- Hops a little when tapped, instead of opening its lid.

ruins.png

about 1400 × 500

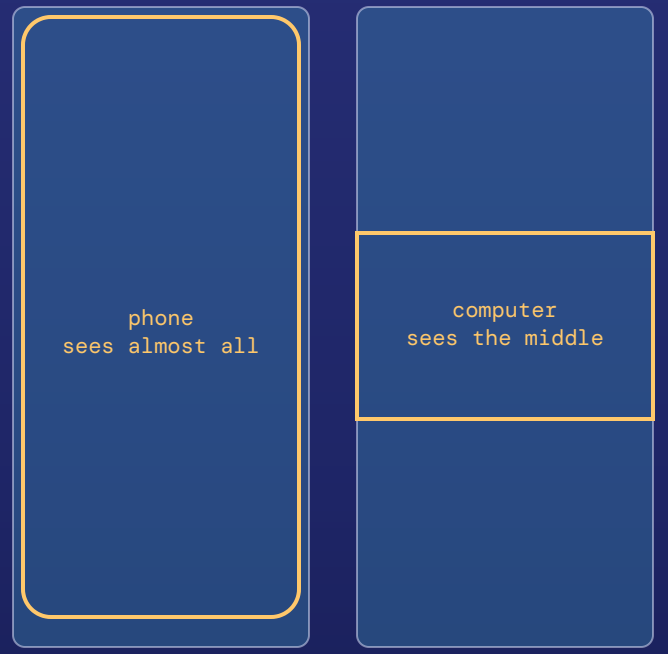

- Wide, standing on the bottom edge.
- Placed on the far shelf, so it is shown hazy and distant.

These appear in your sea once you buy them in the shop. Your drawing shows on the shop plate either way.

BACKGROUND

The painted sea behind everything

- `background.png` or `.jpg`, **portrait, about 1200 × 2600**: water, light and distant hills.
- Paint it in daylight. For sunset it gets a little darker, and for midnight much darker.
- Or paint one for each time of day: `background-day`, `background-sunset` and `background-midnight`. Each is shown exactly as you painted it, and they fade into each other when the light changes.
- It replaces the water, the far hills, the far shelf and the distant kelp. The sunlight from the surface, your creatures, and the **rocks, seagrass and sand in front** stay, because the seahorses hold on to the seagrass and your bottles rest on the ledge.
- It fills the screen. On your phone you'll see almost all of it. On a wide computer screen only a band through the middle shows, so keep anything important near the middle.

QUICK REFERENCE

Every file at a glance

NAME	SIZE	FACES / FRAMING	NOTES
whale.png	1400 × 500	Right; nose and tail touch the edges	Far away, shown hazy
jellyfish.png	500 × 700	Bell at top, full width	Colour versions: cyan, lilac, gold, ribbon
seahorse.png	400 × 700	Right; head top, tail bottom	Colour versions: coral, gold, lilac
bottle.png	600 × 220	Neck right; base and cork touch the edges	Daily and kept bottles
pearl.png	160 × 160	Round, fills the square	Also the pearl icon
kelp.png	300 × 1000	Root at bottom centre	Sways, every other one mirrored
coral.png	800 × 800	Base at bottom centre	Sways a little
chest.png	700 × 500	Front view	Bottom tenth in the sand
ruins.png	1400 × 500	Stands on bottom edge	Far shelf, shown hazy
background	1200 × 2600	Portrait, PNG or JPG	Or one each: -day, -sunset, -midnight

Sizes are roughly what looks sharp on your phone. Close enough is fine, and the proportions matter more than the exact numbers.

WHEN A DRAWING IS FINISHED

Send it to me, and it swims into your sea

1. Save it as a **PNG with a transparent background**, cropped tight.
2. Name it as in this guide, for example `whale.png` or `jellyfish-gold.png`. Lowercase, no spaces.
3. Send it to me.
4. I'll put it in, and you'll see it the next time you open your sea. If it's already open, just refresh the page.

A quick checklist

- Transparent background, no paper showing.
- No empty space around the edges.
- Whale, seahorse and bottle facing right.
- Plants and coral standing on the bottom edge, in the middle.
- Daylight colours. Night takes care of itself.

Have fun with it. R.
